PROFESSIONAL SUMMARY

- Java & DevOps oriented engineer with **7.5+ years of experience** in enterprise application environments
- Hands-on experience with **Java/Spring Boot microservices architectures** and **scalable distributed applications**
- Experienced in **production reliability engineering, incident response, and operational excellence for critical systems**
- Built and optimized enterprise **CI/CD pipelines using Jenkins, GitHub Actions and GitOps** deployment strategies
- Managed Kubernetes-based platform supporting containerized workloads including **microservices and ML inference services** with implementing GPU-aware scheduling and **autoscaling policies on AWS EKS**
- Implemented **GitOps workflows using ArgoCD and Helm** for automated and version-controlled Kubernetes deployments
- Hands-on expertise with AWS cloud infrastructure including **EKS, EC2, S3, IAM, CloudWatch, Lambda, and using Terraform**
- Built observability stack (**Prometheus, Grafana, Splunk**) extended to **monitor AI/ML workload metrics** — model latency, inference throughput, and resource utilization for GPU-backed pods
- Experienced in **cloud-native microservices architecture, distributed systems, scalability optimization, and platform engineering**
- Proven ability in **Root Cause Analysis (RCA)** and **Major Incident Management (MIM)**

TECHNICAL SKILL SET

- **Programming:** Java, Core Java, J2EE, Spring MVC, Hibernate, REST APIs
- **DevOps & CI/CD:** GitHub Actions, Jenkins, Git, GitHub, Bitbucket, CI/CD Pipelines, GitOps (ArgoCD), Helm, Ansible
- **Containers & Orchestration:** Kubernetes, Docker, Terraform
- **Cloud:** AWS (EC2, S3, SQS, VPC, EKS, ECR, Athena, Quick Sight, ALB, NLB, IAM, Route53), Apache Kafka, Event Streaming, Azure
- **Monitoring & Logging:** Splunk, Prometheus & Grafana, AWS CloudWatch & CloudTrail
- **Operating Systems:** Linux (RHEL, Ubuntu), Windows Server 2019
- **Databases:** MS SQL Server, Amazon DS, Aurora, DynamoDB, RedShift
- **Web & Middleware:** Tomcat, JBoss, IIS, HTTPS, SSL/TLS
- **Security & Identity:** LDAP, Active Directory, CyberArk
- **Scripting:** Python, Bash, Shell scripting (basic automation)
- **ITSM & Collaboration:** Jira, ServiceNow, Confluence, SC3

PROFESSIONAL EXPERIENCE

Volkswagen Group India – Gurgaon

Senior Software Engineer / IT Specialist | Dec 2022 – Present

Project: Shopfloor IT & MES KoKo (Volkswagen Group, Germany)

Responsibilities & Achievements:

- Managed production reliability and operational excellence for enterprise-scale applications supporting critical manufacturing systems, **ensuring 99.9% uptime and adherence to SLA/SLO targets**.
- Designed and implemented **CI/CD pipelines using Jenkins and GitHub Actions**, reducing deployment time by **40%** and minimizing manual errors.
- Managed **Kubernetes-based platform (AWS EKS)** supporting cloud-native and **AI/ML workloads**, implemented GPU-aware node scheduling, resource quotas, and horizontal pod autoscaling to support high-throughput inference services alongside existing microservices.
- Implemented **Infrastructure as Code using Terraform** to provision and manage AWS resources, reducing deployment time by **40%** and minimizing configuration errors.
- Implemented GitOps-based deployment strategy using **ArgoCD and Helm for Kubernetes** applications including ML model serving containers enabling automated, version-controlled rollouts and instant rollback for model updates across environments.
- Designed and managed **Helm charts for Kubernetes deployments**, improving reusability and consistency across environments
- Automated configuration management and server provisioning using **Ansible playbooks**, reducing manual effort and configuration
- Integrated **ArgoCD with CI/CD pipelines** to enable continuous deployment and faster rollback mechanisms
- Extended **Prometheus and Grafana** observability stack to **monitor AI/ML workload metrics** including model inference latency, request throughput, and GPU/CPU utilization configured alerting for SLO breaches on latency-sensitive services.
- Implemented **Apache Kafka-based asynchronous communication** between microservices for real-time event processing
- Executed **SSL/TLS certificate management, HTTPS configuration**, and secure application access.
- Led incident response, root cause analysis, and production reliability improvements for critical enterprise systems
- Automated provisioning of **AWS EKS clusters and EC2 instances using Terraform**, enhancing scalability and reducing manual intervention in infrastructure management.
- Managed **highly available enterprise platforms supporting thousands of users across global production environments**.

Environment: Java, AWS, Kubernetes, Windows, Linux, MS SQL

Tools: GitHub Actions, Jenkins, Git, Bitbucket, Splunk, Jira, Confluence, PuTTY, WinSCP

Capgemini – Noida

Application Operations Technical Analyst | Sept 2021 – Dec 2022

Project: Waitrose & Partners – Transport Management System (UK)

Responsibilities:

- Managed production operations and reliability for **enterprise Java/Spring MVC applications** deployed in high-availability environments
- Troubleshoot complex production incidents, analyzed application logs, and optimized application performance
- Worked closely with Dev and QA teams for **release deployments and hotfixes**.
- Integrated enterprise systems and ensured reliable end-to-end data flows
- Used **Splunk and Jenkins** for monitoring, troubleshooting, and deployments

Environment: Java, Spring MVC, Hibernate, DB2, Tomcat, JBoss

Tata Consultancy Services (TCS) – Mumbai

System Engineer / L3 Support Analyst | Feb 2019 – Aug 2021

Project: National Pension System (NPS – NSDL CRA)

Responsibilities:

- Developed and maintained enterprise Java applications supporting critical financial systems
- Performed unit testing, integration testing, and production deployments.
- Provided **L3 production support**, RCA, and defect fixes.

PROJECTS / DEVOPS INITIATIVES

- Implemented **GitOps** workflow using **ArgoCD** for Kubernetes deployments, enabling automated and version-controlled releases
- Developed reusable **Helm** charts for microservices deployment across environments
- Automated infrastructure and configuration management using **Terraform and Ansible**
- **Built CI/CD pipelines** integrating **GitHub Actions, Jenkins, and ArgoCD** for end-to-end automation

CERTIFICATIONS and TRAININGS

- **Microsoft Certified: Azure Fundamentals (AZ-900)** Microsoft: cc0b6c90-3542-44b1-81ea-c62267fdded02)
- **GitHub Copilot - The Complete Guide – 2026** (Credential ID UC-dd800592-52fc-41dd-9e32-c993839a01fe)
- **GitHub Actions - The Complete Guide** (Credential ID UC-a70997d8-eb3e-45ea-b672-b4e1ce6ea3ab)
- **GitHub Actions – CI/CD Automation** (Credential ID: UC-1be85ce5-e137-4815-985a-54da4a21498a)
- **DevSecOps & DevOps with Jenkins, Kubernetes, Terraform & AWS** (Credential ID UC-851e2043-40f5-4b6c-924c-e8ce54af1b9e)
- **Ultimate AWS Certified Solutions Architect Associate 2026** (Credential ID UC-f973cf6e-639d-4602-9efc-07856e769833)
- **Ultimate DevOps Project Implementation** (Credential ID UC-6d8cf276-d00d-474f-9bdc-eff06dc5aa00)
- **Prompt Engineering for Work** (Credential ID UC-39d0d23f-1070-4226-b5c9-d3b87ba609cc)
- **Learn GIT In depth with Bitbucket- Practical workflows** (Credential ID UC-5d82c1d4-4922-4216-9ec6-193315c0f24c)
- **Windows Server 2019 Administration** (Credential ID: UC-101d3351-511e-4622-a5d0-430deae76c31)
- **Linux Master Class** (Credential ID: UC-bc9633ea-22ca-448c-8f15-41af2eb7e686)
- **The Complete SQL Bootcamp: Go from Zero to Hero** (Credential ID: UC-6e29307c-6d68-4de2-8dc1-f09a39f0c533)
- **The Complete Splunk Beginner Course** (Credential ID UC-15df9149-7bd8-4bff-809e-ec51d799408d)

EDUCATION

- **B.Tech – Computer Science & IT** (2018)
Institute of Engineering & Technology, MJP Rohilkhand University – **82.6%**

PERSONAL DETAILS

- Date of Birth: 4th July 1995
- Languages Known: English, Hindi
- Passport details: **S9158387**, valid till 24th Feb 2029 and Schengen VISA stamp valid till July 2027
- Hobbies: Cricket, Reading Books, Road Trips and Driving

AWARDS AND ACHIEVEMENTS

- **Innovation Award for Q1 & Q2, 2025** for MES@KoKo: Volkswagen
- **Technology Leadership:** Efficient as POLO- Volkswagen
- **Java Proficiency Award:** Capgemini

PERSONAL DETAILS

- **Languages:** English, Hindi
- Availability: **Immediate Joiner | Serving Notice Period**
- Open to **Java DevOps Engineer / Site Reliability Engineering / Platform Engineering / AI-ML Ops Roles** roles
